Pig, hog and boar essentially describes the same animal, with some distinctions.

A boar is an uncastrated male pig, but it also refers to a wild pig of any gender.

A hog often means a domestic pig that weighs more than 120 lbs. Pigs are also referred to as swine.

2019 is the year of the Pig, according to the original Chinese zodiac, however it was replaced by the Boar in the Japanese and Tibetan zodiacs.

When the Chinese zodiac was imported into Japan sometime during the reign of Emperor Kinmei (509-571 CE), the Japanese were more familiar with wild boars than domestic pigs. Thus, Pig Year was known as Boar Year in Japan.

At that time, the Japanese hunted and ate boar meat, however it wasn't till a century later that domestic pigs were introduced to Japan from the Korean Peninsula.

Tree roots constantly seek a water source. In doing so, they can spread very deep or very shallow and in an extremely large radius from the trunk. A tree can develop roots that are two, three times its height.

Mahalo Nui to the shrine's neighbor, **Rudy Santiago** for first pressure washing the concrete before chipping out concrete from the bottom edge of the cracks. He then coated the inside of the cracks with concrete adhesive and patched and sealed the cracks with cement.
